

# Cardboard Tree Visiting Teaching Message for September, 2009

Made by: Gladys Araneda for [VisitingTeaching.net](http://VisitingTeaching.net)

## Instructions

- 2 pieces of green chipboard (or a painted cereal box) or cardstock (12"x12")
- 1 piece of brown paper/cardstock (regular 8.5"x11" or some scraps)
- Fold both pieces of the green chipboard or cardstock and trace the tree on ea.
- Cut out the 2 trees.
- Trace and cut out the tree trunks from the brown paper/cardstock.
- Glue the brown trunks to the trees.
- On the 1st tree make a slit down the middle of the tree to the center (approx 5" long starting from the top). On tree 2nd tree make a slit up from the base of the tree to the center (approx 5" long starting from the bottom).
- Slide 2nd tree over the 1st tree so they fit together via the slits. They should fit together and form a "+" if looking from the top. Should stand by it's self.
- Print this page (the page with the leaves) on a different shade of green than the color of the tree (or get creative) and adhere the leaves to your tree.
- Include a copy of the message with the tree.

# Tree / Arbol

Trace and cut the tree over a folded piece of green chipboard/cardstock. Do it twice. Trace and cut out 2 trunks from brown cardstock.

~

Marcar el árbol sobre la cartulina doblada y cortar 2 veces. Marcar el tronco sobre cartulina color café 2 veces y cortar.
